# Shaping Digital Trust in The Calgary Tech Ecosystem

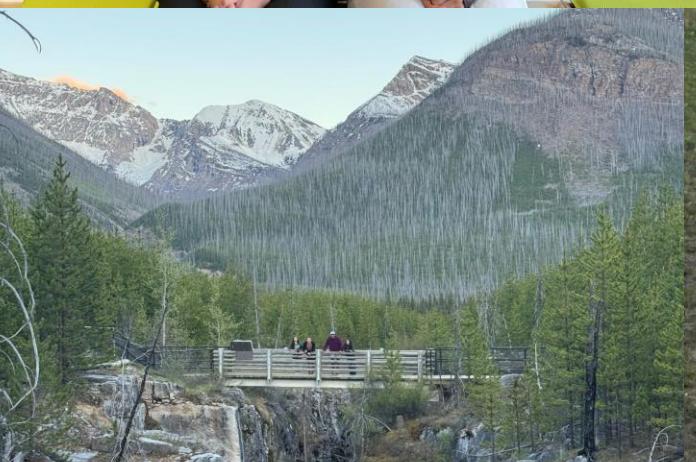

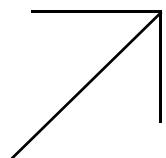

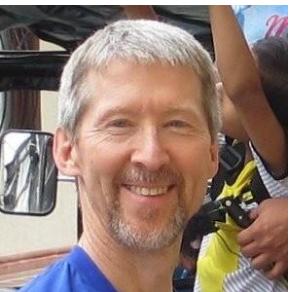

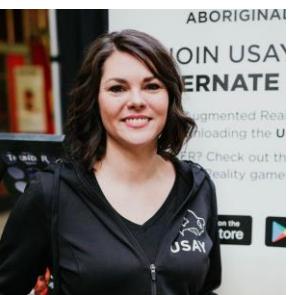

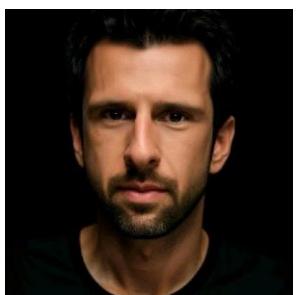

## **Morehead-Cain Scholars and Students @ the University of North Carolina at Chapel Hill, partnering with the City of Calgary's Wave Tech to Investigate Digital Trust**

- Ecosystem Outreach: Tech Industry in Calgary
- What is the best way to engage Calgarians to build trust in Smart Cities initiatives?
- What are Calgarians' concerns regarding the Calgary tech ecosystem?

# **Our Team**

# The Voices

# Five Key Findings

# 1. Privacy is Personal and Risk-Laden

*Privacy underpins digital trust, but when it's seen as unmanageable or inevitably violated, people disengage and feel exploited.*

*"The tentacles of privacy and lack of privacy are everywhere, so it becomes a little bit overwhelming."*

*- Margo Purcell, CEO of InceptionU*

## 2. Transparency is Necessary, but Rarely Sufficient

***Transparency without accountability or action can backfire, eroding trust rather than building it.***

*“Transparency isn’t even the solution. If you’re being transparent doing bad things, the things are still bad.”*

*- Käthe Lemon, President and Co-Owner of RedPoint Media Group*

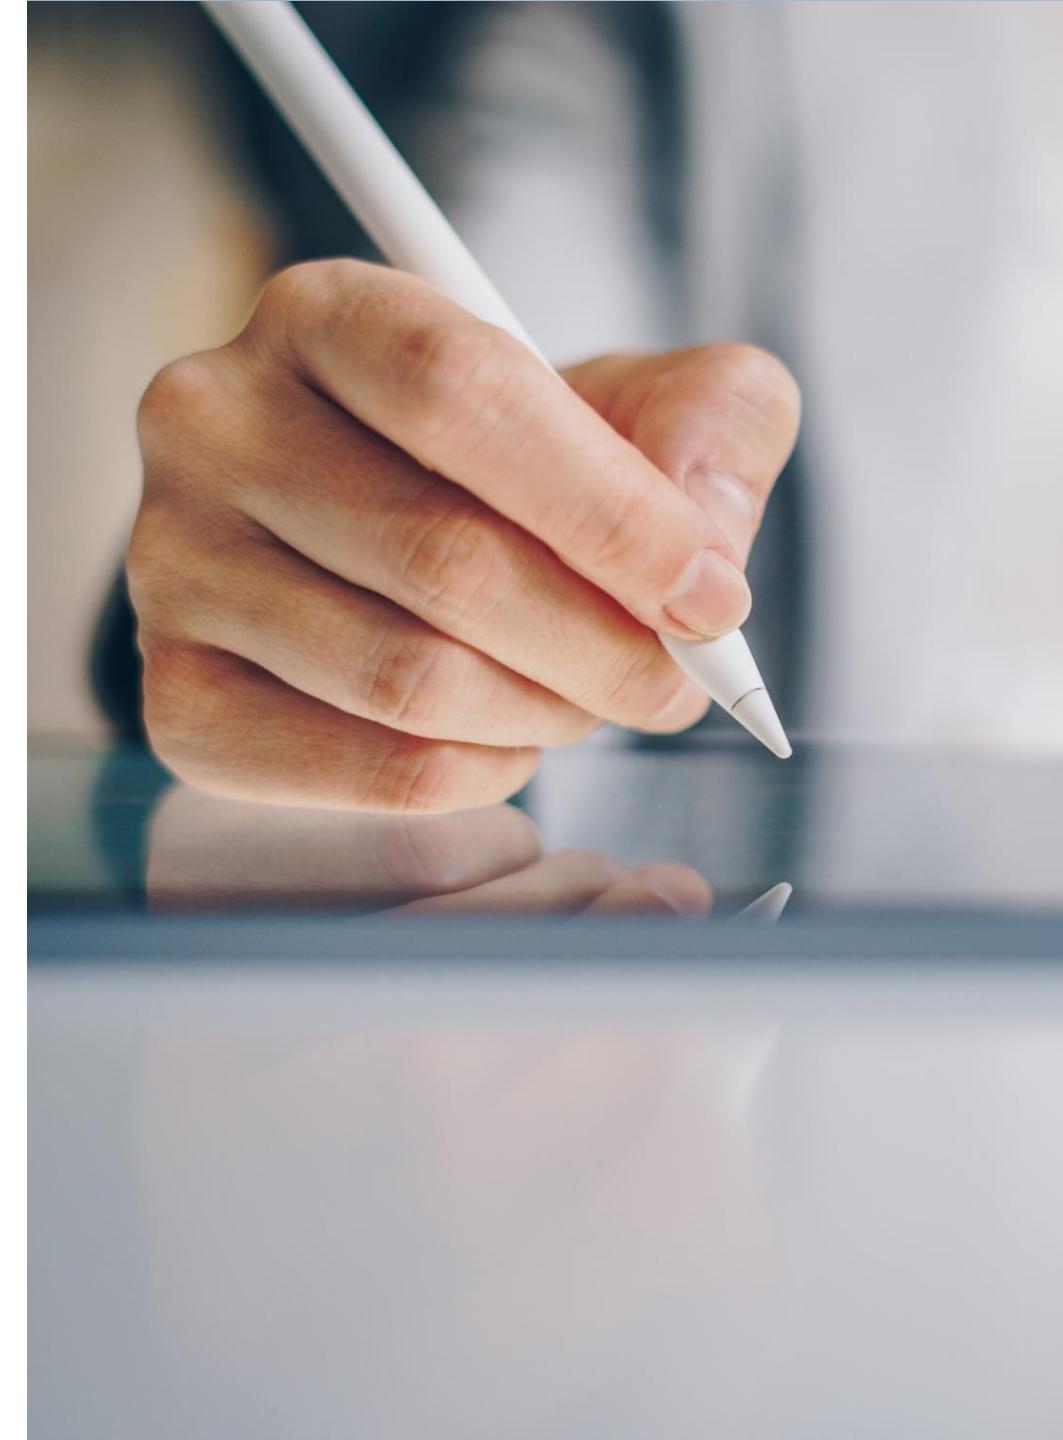

### 3. Stewardship Requires Accountability, Not Just Infrastructure

**True digital stewardship comes from culture, education, and ethical responsibility, not just policies or tech safeguards.**

*“If you’re pumping out code faster than you can vet, you’re going to cut corners.”*

*- Chris Karaplis, CEO of Simply Embedded*

# 4. Human Connection is Essential, Even in Tech-Centric Systems

**People, not platforms, are what build trust, even in the most technology-driven systems.**

*“You can have all of the tech in the world, but if you can’t create a personal connection with people, they’re not going to believe what you say.” - Mayor Gondek*

## 5. Digital Trust is a Relational, Participatory Concept:

**Digital trust is a two-way relationship where both communities and companies must actively invest to sustain it.**

*“If you want to have a voice on key decisions, you need to make sure that you are part of the process.”*

*- Aly Khan Musani, CFO & COO at Symend*

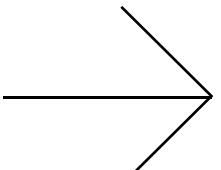

# Ecosystem Challenges

**Without aligned incentives, digital privacy, transparency, and stewardship struggle to gain traction because ethics are rarely rewarded commercially.**

*“Prioritizing ethical tech and transparency means creating demand... regulation infrastructure only goes so far.”*

*- Jacqueline Lu, CEO and Founder of Helpful Places*

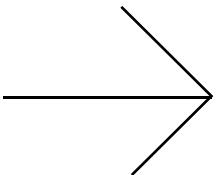

**Ecosystem Challenge 1:  
Misaligned Incentives**

**Digital trust plays very different roles across public and private sectors, making collaboration toward common goals challenging.**

*“Trust is built by doing the better thing for the consumer rather than yourself.”*  
- Käthe Lemon, President and Co-Owner of RedPoint Media Group

**Ecosystem Challenge 2:  
Bridging Different Mandates: The  
Public and Private Tech Sector**

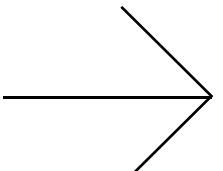

**For Indigenous communities, digital trust must center on self-determination, consent, and data sovereignty – building from a foundation of cultural relevance and local control.**

*“Threats to Indigenous data are a continuation of old processes of extraction and exploitation.”*

*- Tahu Kukutai, Professor at University of Waikato*

**Ecosystem Challenge 3:  
Data Sovereignty**

# External Case Studies

# External Research + Case Studies

| Entity                                    | Action  | Outcome  |
|---|---|--|
| <b><i>San Jose x tech procurement</i></b> | Application of Social Procurement Principles to Digital Goods | Started GovAI Movement   |
| <b><i>Estonia DataTracker</i></b>         | Targeted & Personalized Transparency                          | Tool for citizens to access data and hold collectors accountable |
| <b><i>Amsterdam Tada Manifesto</i></b>    | Reshaping Tech Culture  | Movement around a culture of stewardship and principles          |

# Recommendations

Showcase real local leaders who model privacy, transparency, and stewardship, building trust by demonstrating that ethical technology isn't just theory, it's already in practice in Calgary

# Ethical Tech Practices Video

# Margo Purcell

## CEO, InceptionU

Align the City's purchasing decisions with digital ethics by rewarding vendors who prioritize privacy and transparency
